description

The ′F157A is a quadruple 2-input data selector/multiplexer featuring a common strobe ($\overline{G}$) input. When the strobe is high, all outputs are low. When the strobe is low, a 4-bit word is selected from one of two sources and is routed to the four outputs. The ′F157A provides true data.

The SN54F157A is characterized for operation over the full military temperature range of $-55°C$ to $125°C$. The SN74F157A is characterized for operation from $0°C$ to $70°C$.

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)‡

Supply voltage range, V_{CC}	−0.5 V to 7 V
Input voltage range (see Note 1)	−1.2 V to 7 V
Input current range	−30 mA to 5 mA
Voltage range applied to any output in the high state	−0.5 V to V_{CC}
Current into any output in the low state	40 mA
Operating free-air temperature range: SN54F157A	−55°C to 125°C
SN74F157A	0°C to 70°C
Storage temperature range	−65°C to 150°C

‡ Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTE 1: The input voltage rating may be exceeded provided that the input current rating is observed.
