IPXY rating is based on 3rd party testing and customers should check suitability and test system level IPXY rating before ordering.

INSERT SLEEVE, SPACER, FOR IEC 60320 C19, BLACK, TO CREATE A TIGHT FIT BETWEEN A POWER CORD AND RECEPTACLE DUE TO IEC 60320 TOLERANCES

- Easily slips onto the end of the C19 plug
- Eliminates C19 plug from jiggling in place
- Strength to securely hold plug in place

Photo of product applied:

\*Only the black sleeve is included

Sleeve Color: Black

Sleeve Material: PA66 Plastic Polyamide (Nylon)

flammability rating of UL 94V-2

Operating Temperature: -20°C to +80°C

Average Extraction Force: 30 lbs/sq. in.

Weight: 0.001 lbs

Warning: When removing connector with this sleeve included, take care not to damage the inlet when removing the connector. To remove the Sleeve that remains in the inlet after cord extraction, ensure the power cord is not plugged into power and use a non-conductive tool to extract.

Installation instructions: Fully insert cord to avoid arcing between conductors. Without a sleeve, 9 lbs of force pull are required to extract a C19 connector from a C20 receptacle. When using this sleeve the average is 30 lbs of force pull to extract a C13 connector. Repeated insertions and extractions may reduce the force pounds required to extract a C13 Connector over time.

For proper performance, use on GlobTek power cords only.
