## 8.0 PACKAGING AND PRECAUTIONS

8.1 The product is packed in tape and reel, put into moisture barrier bag and vacuum sealed together with desiccant & humidity indicator.

8.2 Precautions:

MSL rating: 3

1. Recommended storage conditions before unpacking: +5°C to +30°C, maximum humidity 60%.
2. Recommended use within 168 hours after unpacking. For details, please refer to MSL label on packaging.
3. Connectors that have not been used up after 168 hours are suggested to be vacuum packed with desiccant. It is recommended that the parts are baked based on below process before reflow.
4. Baking process: remove tape and reel from vacuum sealed packaging and bake at 60°C ≤5% RH for 72 hours.
5. If floor life is not consistent with MSL rating 3 and above suggestions, air leakage performance post reflow will be impacted.
