

Straight Cable Assemblies

Length in inches	Tolerance
▪ 0 - 30	▪ +.25" / -0"
▪ >30 - 60	▪ +.50" / -0"
▪ >60 - 120	▪ +1.0" / -0"
▪ >120	▪ +1% / -0%

Twisted Pair Cable Assemblies

Length in inches	Tolerance
▪ 0 - 60	▪ +/- .25"
▪ >60 - 120	▪ +/- .50"
▪ >120	▪ +/- 1%

The specified length of Digi-Key's value-add ribbon cable assemblies is the length of the cable between connectors. On single ended assemblies enough additional cable is included to add another connector while still maintaining the specified length between connectors.

Exception - Twisted ribbon uses a 20" repeating pattern of 18" twisted, 2" straight. The specified length of twisted pair assemblies is the length of cable before adding the connectors.

For custom lengths or configurations, send inquiries to custom.orders@digkey.com
