

REPLACEMENT BRASS COILS FOR TY-98 CLEANER

Product Description

Keep your tips clean with the TY-98 brass coils cleaner. Cleans without water and is faster and safer than a sponge! The shock from a wet sponge can damage iron tip plating over time, leading to poor soldering performance and frustration.

Key Features

- Brass coils do not reduce tip temperature like water that shocks the tip and deteriorates the plating over time.
- Soft coils of brass are tough enough to remove oxidation but soft enough to not remove plating.
- Easy to use – simply plunge soldering tip into it.
- Includes one coil.

Additional Information

- Part Number: AOREF98B
