

STEARINE FLUX STICK – 3oz**Product Description**

A convenient 1oz stick of non-toxic soldering flux dispersed in a wax-like, easy to apply vehicle. Residues are non-hygroscopic and non-hazardous. Excellent for soldering battery terminals and electrical (not electronic) connections. Used in soldering to protect surfaces of lead sleeves and cable sheath from oxidation. Also commonly used for lead came in stained glass making.

Key Features

- Convenient size 1oz flux stick
- Wax-like cylinder for easy application
- Produced from pure stearic acid flux
- Non-hazardous and non-hygroscopic residues
- Free from paraffin, vegetable oils, waxes, and other contaminants.
- This product is RoHS Compliant

Availability

- **FS-3OZ-1PK** – Single 3oz flux stick.
