

Plastic enclosure for CLICKER 4

PID: MIKROE-6359

Plastic enclosure for Clicker 4 (the C7016014 from OKW) is designed to protect and securely house Clicker 4 products from MIKROE. This two-piece enclosure features a durable ABS/PC construction, offering high resistance to dust, water, and impacts, meeting IP 66, IP 67, and IK 07 protection standards. It includes a transparent top for the visibility of internal components and attachment domes for easy PCB mounting, making it ideal for the development and testing phases. Additionally, the enclosure is equipped with a quick-action stainless-steel lock and sealing for enhanced protection in demanding environments. This plastic enclosure is perfect for applications requiring reliable protection for Clicker 4 in harsh or field conditions, ensuring durability and ease of use.

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system.
 ISO 14001: 2015 certification of environmental management system.
 OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).
