

NetDirector USB Server Interface Unit with Virtual Media Support (B064-Series), TAA

MODEL NUMBER: B055-001-USB-V2

Description

This USB Server Interface Unit with Virtual Media support connects a USB server to a B064-IPG Series NetDirector® KVM switch using Cat5e/6 cabling. The server connected using this interface unit will be able to access the Virtual Media functionality of the B064-IPG series KVM switch. Use of Cat5e/6 cables frees up space in server cabinets that would otherwise be filled by traditional, bulkier KVM cable kits. Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases.
 Note: SIUs that were purchased prior to that of your KVM switch may require a firmware upgrade in order for them to work properly (see Maintenance under OSD Operation section of your B064-Series KVM Owner's Manual for details).
