The technical information shown in the data sheets are limited to the typical characteristics and circuit examples of the referenced products. It does not constitute the warranting of industrial property nor the granting of any license.

**1.Storage time**

LED can be stored for a year under the condition:the temperature of 5°C-28°C and humility of RH60%,These production must be re-inspected and tested before use if their storage time exceed a year.

**2.ESD countermeasure**

Static electricity and high volt can damage LED, must put on static glove and static fillet,  
Soldering tool and the cover of device must connect the ground,  
soldering condition follows the related stating of production specification manual.

**3.Soldering**

When soldering leave a minimum of 2mm clearance from the base of the lens to the soldering point.  
Dipping the lens into the solder must be avoided.  
Do not apply any external stress to the lead frame during soldering while the LED is at high temperature.  
Recommended soldering conditions:

Soldering iron		Wave soldering	
Temperature	320°C Max	Pre-heat Pre-heat time	120°C Max 120 sec.Max
Soldering time	3 sec.Max (one time only)	Solder wave Soldering time	260°C Max 5 sec.Max

Note: Excessive soldering temperature and/or time might result in deformation of the LED lens or catastrophic failure of the LED.

**4.Drive Method**

An LED is a current-operated device,In order to ensure intenity uniformity on multiple LEDs connected in parallel in an application,it is recommended that a current limiting resistor be incorporated in the drive circuit,in series with each LED as shown in Circuit A below.

(A)Recommended circuit

(B)The brightness of each LED might appear different due to the differences in the I-V characteristics of those LEDs.

**Soldering temperature curve chart**

**NOTES**

- After soldering the LEDs, the epoxy bulb should be protected from mechanical shock or vibration until the LEDs return to room temperature.
- A rapid-rate process is not recommended for cooling the LEDs down from the peak temperature.
