

# Data Sheet

Customer:

Part No:

CL-BIT3216DWW-3K-02

Sample No:

Description:

Item No:

3216 SMD White Color

| Customer |            |          |      |  |  |  |
|----------|------------|----------|------|--|--|--|
| Check    | Inspection | Approval | Date |  |  |  |
|          |            |          |      |  |  |  |

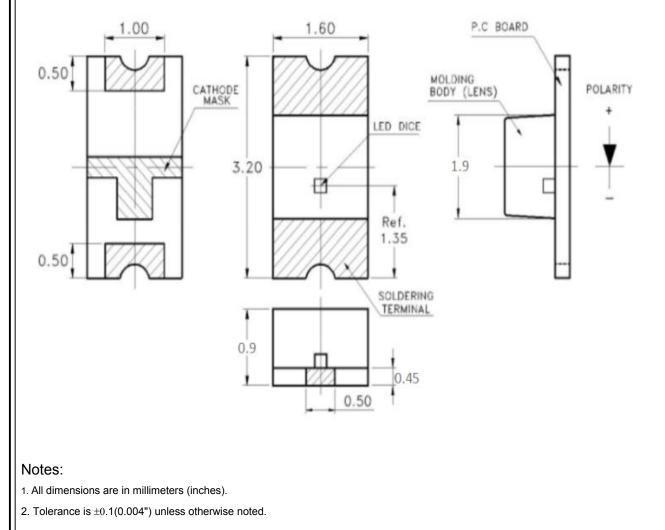

#### Features

3.2mmX1.6 mm SMT LED, 0.9mm THICKNESS. \_LOW POWER CONSUMPTION. \_WIDE VIEWING ANGLE. \_IDEAL FOR BACKLIGHT AND INDICATOR. \_VARIOUS COLORS AND LENS TYPES AVAILABLE. \_PACKAGE: 3000PCS / REEL. \_RoHS COMPLIANT.

#### Description

The Yellow source color devices are made with Gallium Arsenide Phosphide on Gallium Phosphide Yellow Light

#### Package Dimensions

3.Specifications are subject to change without notice.

#### Selection Guide

| Part No.            | Dice        | Lens Type       |      | (mcd)<br>20mA | Viewing<br>Angle      |  |
|---------------------|-------------|-----------------|------|---------------|-----------------------|--|
|                     |             |                 | Min. | MAX.          | <b>2</b> θ <b>1/2</b> |  |
| CL-BIT3216DWW-3K-02 | White (GaN) | Yellow Diffused | 700  | 1200          | 120                   |  |

#### Note:

1.  $\theta$ 1/2 is the angle from optical centerline where the luminous intensity is 1/2 the optical centerline value.

#### Electrical / Optical Characteristics at TA=25°C

| Symbol | Parameter                | Device | Тур. | Гур. Мах. |     | Test Conditions |  |
|--------|--------------------------|--------|------|-----------|-----|-----------------|--|
| λD     | Dominant Wavelength      | White  | 2500 | 3500      | Kim | IF= 20 mA       |  |
| Δλ1/2  | Spectral Line Half-width | White  |      |           | nm  | IF= 20 mA       |  |
| С      | Capacitance              | White  |      |           | pF  | VF=0V;f=1MHz    |  |
| VF     | Forward Voltage          | White  | 2.7  | 3.3       | v   | IF= 20 mA       |  |
| IR     | Reverse Curren           | White  |      | 2         | uA  | VR = 7V         |  |

#### Remarks:

If special sorting is required (e.g. binning based on forward voltage, luminous intensity, or wavelength), the typical

accuracy of the sorting process is as follows:

- 1. Wavelength: +/-1nm
- 2. Luminous Intensity: +/-15%
- 3. Forward Voltage: +/-0.1V

Note: Accuracy may depend on the sorting parameters

#### Absolute Maximum Ratings at TA=25°C

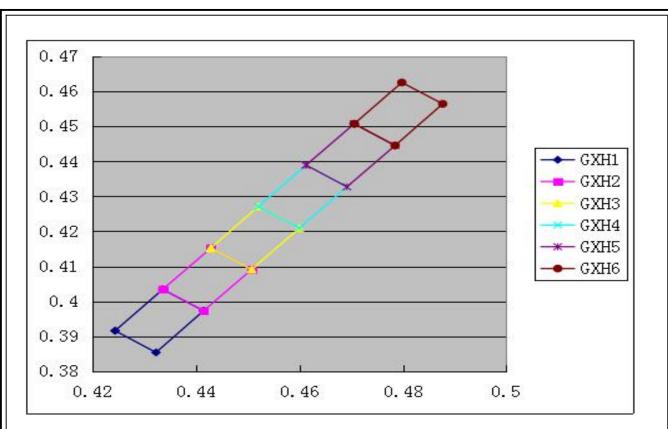

| Parameter                     | White          | Units |
|-------------------------------|----------------|-------|
| Power dissipation             | 75             | mW    |
| DC Forward Current            | 25             | mA    |
| Peak Forward Current [1]      | 80             | mA    |
| Reverse Voltage               | 5              | V     |
| Operating/Storage Temperature | -40°C To +85°C |       |

#### Note:

1. 1/10 Duty Cycle, 0.1ms Pulse Width.

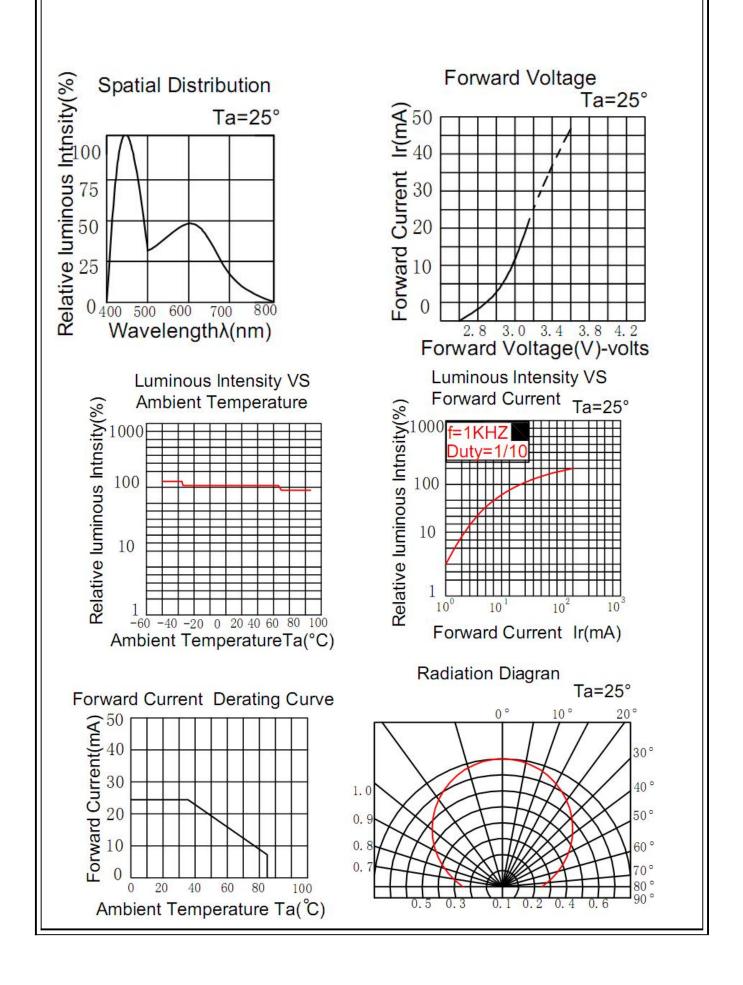

| 色   | X  | X1     | ¥1      | X2     | Y2      | X3      | ¥3     | X4      | Y4     | X1      | ¥1      |

The above test items such as differences or special customer specific requirements according to the actual situation in accordance with the requirements of customers to try the requirements with the customer, the customer is not required by our test standard test. Different products using different current test

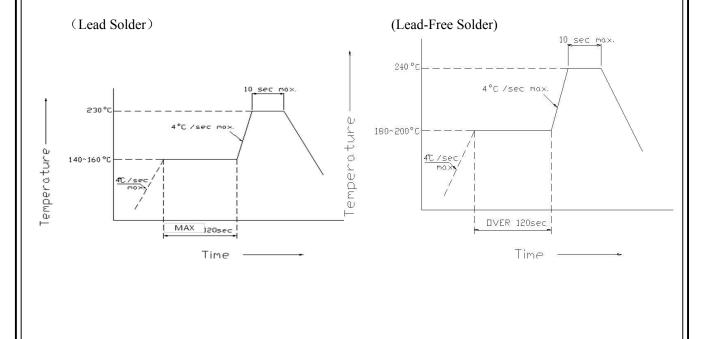

### 5. Cautions

#### (1) Soldering Conditions

Number of reflow process shall be less than 2 times and cooling process to normal temperature is required between first and Second soldering process.

(Recommended soldering conditions)

(2) Static Electricity

It is recommended that a wrist band or an anti-electrostatic glove be used when handling the LEDs.

All devices, equipment and machinery must be properly grounded.

Damaged LEDs will show some unusual characteristics such as the forward voltage becomes lower, or the LEDs do not light at the low current. Criteria : (VF > 2.0V at IF=0.5mA)

(3) Moisture Proof Package

It is recommended that moisture proof package be used .

(4)Cautions:

4.1. Please check if there is air leak before opening the package, if so, please return the goods back

to take drying process for later using.

4.2 Products can be used within 15days after packaging, after that, they must be:

- 4.2.1 Soldered within 24 hrs
- 4.2.2 Used in the condition: 30°C within and 60%RH below

4.2.3 Stored in 30%RH for moisture below.

4.3.Products cannot be used for and over 15days after being packaged unless opening the package and take drying our process in 85℃/6H.

4.4.Products not be used for or over 60days after being packaged please return back to take drying out and packaging process for forward using.

4.5.Products not be used after opening the package need to be dried out for 85°C/6H
